

## GF22 GRASS SEED MIX

This grass seed mix is a good all-round amenity seed mix which will establish very quickly in the spring.

GF22 has the following mix which should be sown at a rate of 35 g/m<sup>2</sup> on newly placed soil and 25 g/m<sup>2</sup> for over seeding.

- Quick to establish
- Hardwearing
- Low Maintenance
- Attractive Sward

One 20 kg bag will cover 571 m<sup>2</sup> at 35 g/m<sup>2</sup>.

We do not recommend sowing until spring. Temperatures need to be around 10 degrees, no frost.

### **Strong Creeping Red Fescue 40%**

The strong creeping red fescue shows both drought and salt tolerance. It maintains its colour until early winter and also has a very fine appearance. Its rhizomatous growth also offers some regenerative capacity in worn areas, and will also bind soil.

### **Perennial Ryegrass 40%**

Gives great wear tolerance and has rapid establishment.

### **Chewings Fescue 15%**

Forms an attractive carpet with high tolerance to adverse conditions such as drought, high or low soil pH, or low nutrient soils.

### **Browntop Bent 5%**

Provides winter greenness (cold tolerant) stoloniferous, binds soil.

Supplied in bags of 20 kg, 10 kg and 2 kg.
