

Greenfix Heavy Duty Newt Barrier Film

The Great Crested Newt and Natter Jack Toad are protected under the Wildlife and Countryside Act 1981 and Habitats Regulations Act of 1994. In addition adders, grass snakes, slow worms and common lizards are also protected under the Wildlife and Countryside Act of 1981 which protects them from injury, killing and sale.

Newt Barrier film is designed for the construction of physical barriers to protect and contain naturally occurring populations of endangered amphibian species. Barriers against these species are very important during and sometimes after civil engineering projects such as pipeline construction and road building.

Product Composition:	Blended Polythene
UVI Protection:	5 Years (UK)
Thickness:	1mm
Score line:	Single score 75mm from the edge
Tolerances:	+/-5%
Size:	1m Wide x 100m roll
Roll Weight:	Approx. 25Kg
Colour:	Green
Surface:	Highly smooth, waterproof finish
Physical Data:	Melting / softening point 160oC

Product is stable at ambient temperatures

Storage and Handling No special precautions. Decomposition at temperatures above 250oC.

Disposal- Landfill / incineration.

Chemically non-reactive and generally regarded as being biologically inert

The specification presented above is to the best of our knowledge, true and accurate. Greenfix Soil Stabilisation and Erosion Control Limited (GSSEC) reserve the right to change any specification without prior notice. GSSEC cannot guarantee or offer warranty on products, unless agreed to in writing for specific conditions or for performance as the manner of handling, use and installation are beyond our control. We will not be liable for damages or losses, direct or indirect, of our GSSEC Range of Products due to the above reasons. All comparative data was correct at time of print. E&OE.
